

NATURIZOL

NATURAL THERMAL INSULATION MADE FROM FLAX FIBRES

NATURIZOL mats is healthy and sustainable insulation made from premium flax fibres.

Due to its properties **NATURIZOL** is comparable alternative to hemp thermal insulation.

It is produced in standard : **1200 x 600 mm**
width:**40/50/60/70/80/90/100/120/140/160 mm**.
Special dimensions are available upon request.

EASY TO USE:

- **ROOF** insulation (above the rafters with grate / between and under the rafters)
- **CEILING** insulation (above, between and below the collets / on the upper side / insulation of partition joist ceiling)
- **INTERIOR-WALL** insulation (partition and hanging walls)
- **PERIPHERAL-WALL** insulation (sandwich or masonry perimeter walls of wooden structures / from interior side / insulation of ventilated facades)

COMPOSITION :

- 82-86% flax fibres
- 11-13% BiCo fibres as bonding-agent
- 3-5% sodium carbonate as flame retarder

PROPERTIES :

- Bulk density.....**32 ± 10% kg/m³**
- Declared.....**λ=0,039 W/(m.K)**
- Reaction to fire.....**class E**
- Heat-retention capacity...**c =1550 J/(kg.K)**
- Vapour diffusion resistance.....**μ ≤ 2,2**
- Favorable sound absorption
- Optimum control of humidity in the interior
- Resistant to rot and pests
- Simple and fast installation
- Ecologically and health harmless
